RESEARCH ACTIVITY

2012-2013 Principal Investigator. **VOICES: Dissemination Grant**

Approximately £39,000 to fund a series of animated shorts depicting the main findings from the VOICES study, as well as other dissemination activities. Wellcome Trust funding.

2011-2012 Principal Investigator. **Better, brighter and more beautiful? A survey of neuroenhancement motivations and practises among UK youth.** London, UK

Approximately £3500 in seed funding to conduct focus groups and prepare grants for a UK national survey, from the STICERD Foundation.

2011-2012. Cognitive Enhancement FP7 Grant Development (with Professor George Gaskell)

Approximately £4000 to prepare FP7 bid in response to cognitive enhancement call. Working with colleagues from several EU countries. LSE Annual Fund.

2009 - pres. Co-Principal Investigator, with Bryan Lask, **Neuroethics and fMRI in Anorexia.** Oslo, Norway & London, UK

Approx £90,000 from the Norwegian Research Council to investigate 1. the experience of adolescent girls with anorexia nervosa (AN) when being part of an fMRI research study on eating disorders; and 2. perceptions of personal identity in relation to anorexia and neurobiology.

2006 – 2011. Principal Investigator, **Voices On Identity, Childhood, Ethics & Stimulants: Children join the debate.** Various locations throughout USA & UK

VOICES is a 5-year investigation into the psychosocial and ethical implications of ADHD diagnosis and drug treatments among US and UK children (website: www.adhdvoices.com), funded by the Wellcome Trust (£290,000), and an LSE Sticerd grant (£5000). A series of working papers and published articles documenting the results of the study have become available on the website as of 2011.

2007 - 2009 Co-Investigator (with S. Franklin & N. Rose) **Translating Neurobiological Research.** London, UK

A Medical Research Council (MRC) funded study (£141,344). The aim is to assist in our understanding of the ways in which medical research translates into biomedical practice and contributes to economic competitiveness.

2004- 2006 Senior Researcher: **Genome-Based Drugs for Depression,** LSE & Institute of Psychiatry. London, UK

A European 6th Framework Project Grant involving 12 human study sites and 3 animal models sites to study the pharmacogenomics of depression. The LSE & SURE (Service Users Research Enterprise) were responsible for the ELSI (ethical, legal and social implications) component of the human study.
